

SUPERMICR[®]

שרתים בממשק הרחבה חרוש המאפשר הרחבה של עד 3 כרטיסים ב-1U ו-7 כרטיסים ב-2U (שש זה בגובה מלא). תוך ניצול אופט מצוי של מקום וחיסון ניכר בעלויות עליו שימוש בכרטיסי UIO מקורים (בקרי SAS, SATA, וכרטיסי רשת XIG 4 זמנים).

Universal I/O (UIO)

Maximized I/O Expandability & Flexibility

Supermicro SAS RAID 5 card

- ✓ 3/7 Add-on Cards for 1U/2U
- ✓ Highly Upgradeable
- ✓ High Efficiency Power (up to 93%*)
- ✓ Multiple Expansion Card options
(SAS RAID 5, 10-G, IB... up to 20 choices)
- ✓ Improves Your Inventory Management

Supermicro UIO servers allow users to select from a wide range of I/O options to provide the ultimate in storage and networking flexibility. When installed, a Supermicro UIO card becomes part of the serverboard, and the system still retains all of its PCI-Express and PCI-X slots for expansion cards. In addition to enabling customizable configurations and optimization for a wide range of application requirements, Supermicro UIO servers also provide cost advantages and investment protection. Future upgrades can be achieved by replacing the UIO card and/or expansion cards instead of replacing entire systems. Without any UIO or expansion cards, a UIO system functions as a cost-effective server. With a UIO card installed, one UIO server supports SAS/SATA RAID5, 4x Gb Ethernet, 10Gb Ethernet, or Infiniband. This versatility helps to minimize the amount of different servers that customers need to operate their business.

* Our new generation power supply efficiency exceeds 93% in most wide-voltage loading operation.
